

2023 FORD F250/F350 4WD 2.5" LIFT KITS

Fabtech announces the release of our current 2.5" lift kits for the use on 2023 Ford F250/F350 4WD.

These Super Duty lift kits provide a solution for enthusiasts seeking to enhance their vehicles with oversized tires and achieve increased wheel travel with a minimal lift height. Capitalizing on the ample Super Duty wheelwell openings, our 2.5" lift kit effortlessly accommodates 35" tall tires, delivering a great on and off road experience.

The Fabtech 2.5" lift kits come in two outstanding options: the Budget and the Basic lift kit. The Budget lift kit caters to individuals seeking additional height and performance beyond what a simple leveling kit can provide. This kit includes front coil springs, a heavy-duty track bar bracket, sway bar drop brackets, and brakeline extension brackets.

The Basic lift kit shares the same features as the Budget kit, boasting new front coil springs, sway bar drop brackets, and brakeline extension brackets. However, it offers the added advantage of a heavy-duty adjustable track bar. This feature ensures exceptional tracking of the front and rear axles, resulting in unparalleled highway stability and control.

Fabtech's 2.5" lift kits also offer a range of options for shocks, including Performance, Stealth, and Dirt Logic 2.25. These various choices allow customers to customize their driving experience based on their preferences and specific requirements.
